

Bio-Well has been developed by an international team led by visionary bio-physicist Dr. Konstantin Korotkov and brings the powerful technology known as Gas Discharge Visualization technique to market in a more accessible way than ever before. The Product consists of a desktop camera and accompanying *Cloud subscription software*, which allows a user to quickly and easily conduct human energy scans.

Dr. Krishna Madappa is a dear friend and colleague of the GDV and Bio-Well inventor, Dr. Konstantin Korotkov for over 15 years. They conduct seminars and educational retreats worldwide. Krishna is the President and Co-founder of the Institute for Science, Spirituality and Sustainability in Taos, NM, USA.

The BIO-WELL is not a medical instrument

Measuring the Human Energy Field

Analysis at Your Finger Tips

Bio-Well is a revolutionary non-intrusive way to measure the human energy field using a specialized camera and software.

Analysis of Personal Energetic Homeostasis

The Technology: GDV Technique

GDV Technique is the computer registration and analysis of electro photonic emissions of different objects, including biological (specifically the human fingers), resulting from placing the object in the high intensity electromagnetic field on the device lens.

When a scan is conducted. A weak electrical current is applied to the fingertips for less than a millisecond. The object's response to this stimulus is the formation of a variation of an electron cloud composed of light energy photons. The electronic glow of this

discharge, which is invisible to the human eye, is captured by the camera system and then translated and transmitted back in graphical representations to show energy, stress and vitality evaluations. The images are mapped to different organs and systems of the body, tapping into Chinese energy meridians.

The image, which we create with *Bio-Well*, is based on Traditional Chinese Medicine and verified by 18 years of clinical experience by hundreds of medical doctors with many thousands of patients. The scanning process is quick, easy and non-intrusive.

Measuring the Energy of Wellness

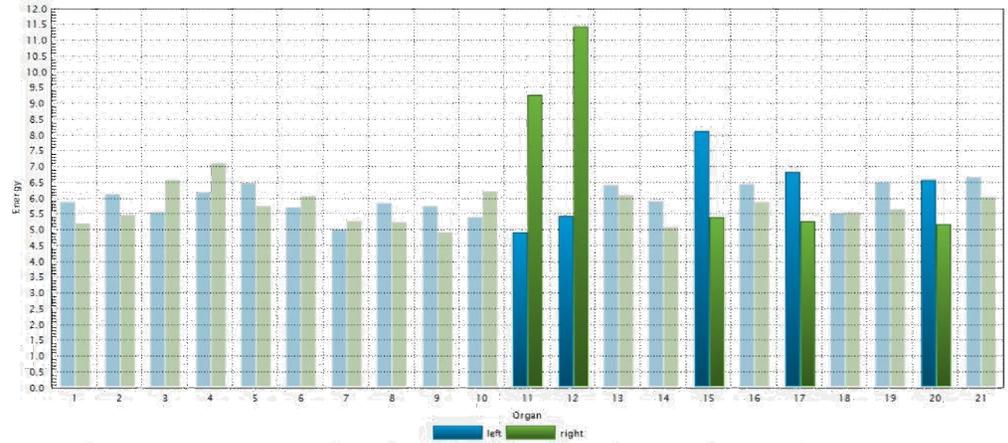

A non-invasive approach to seeing the energy - light information of our bio-field
Direct response analysis of any complementary practice to validate energy state
Monitor and observe the nature of energy distribution in our bio-field

Get real time feedback on positive and negative factors that can affect your energy state.

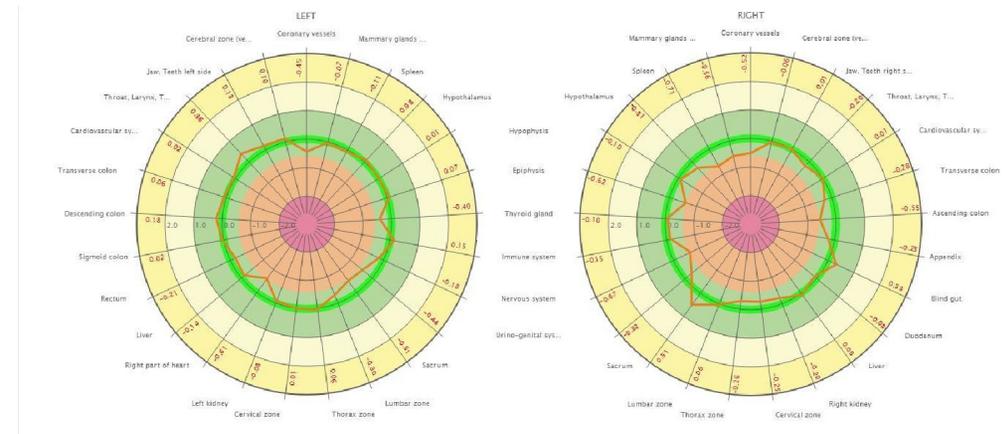

View each scan in a variety of interesting ways with up to 7 display options

Gives an impression of your energy field and allows you to see its day to day transformation and the influence of different situations and stimulus to your HEF and hence, to your condition/adaptation
